OSBORN
PRO

Wheel brushes with crimped wire

The all-round brush for medium to heavy brush applications!

Suitable for use on stationary machines, like bench grinders. Typical applications are: deburring, roughening, removing lacquer, de-scaling and cleaning. Due to their wide face width, multiple row brushes are best choice for treating larger surfaces.

As a standard we can offer wheelbrushes from diameter 75 to 300 mm, with steel wire and stainless steel wire. As a special feature, OSBORN supplies every brush with a range of bore adapters. That way, you can use our wheelbrushes on all common machines.

Cup brushes with crimped wire

Sturdy tools for easy cleaning jobs and brushing larger surfaces!

Fitted for the use on angle grinders. Suitable for roughening, deburring, removing lacquer, de-scaling, cleaning. Available with steel wire, stainless steel wire and brass coated steel wire. Diameters from 80 to 150 mm.
